

## GROUP PARTICIPATION RUBRIC

Your Name: John Waczak

Your Group's Name: South American Giant Bumblebee

For each group member (including yourself), rank the participation of your group members. Each member may participate differently, and a full score in each category is not necessary for a full grade. For example, one member may have taken the role of leader, while another found materials online. Rank group members on a scale of 0 to 4, with 0 representing no participation, and 4 representing maximum participation. Each member's grade will be relative to the entire group's effort in completing this assignment, and in successful completion of the assignment according to instructions.

**Did each group member participate in each phase of the project (A, B, and C)?**

Raelynn, Amina, and Nathan all participated. Evan did a small amount of work but failed to communicate whatsoever with the group despite email attempts and adding him to our group message. We never heard from Samaher.

**Overall, how did this group activity go?**

I think the activity went okay. We had a difficult time getting started but once we did, everything seemed to go smoothly and those that participated worked well together.
