1 Main Section

1.1 Subsection

1.1.1 subsubsection

we can even include code snippets using <s + tab.

Type C-c ' to enter into coding buffer. Be sure to specify desired language in the preamble. Use M-x org-fill-paragraph to make selection fill with correct wrapping

```
import numpy as np
import matplotlib
matplotlib.use("Agg")
import matplotlib.pyplot as plt

x = np.linspace(-10*np.pi,10*np.pi,1000)
y = np.sin(x)/x

plt.figure()
plt.plot(x,y)
plt.savefig("graph.png")
```

Create an image by using [[./image$_{\text{file}}$ and close with two brackets. Use C-c C-x C-v to view the image inline
